**Job Title:** Construction Manager

**Job Description:** Responsible for but not limited to:

- Bid or contract projects for commercial buildings using various Facade Enclosure Systems, CWs (Curtain Walls), Glass, 3D Sheets Metal Panels or Steel Structures
- Bid or contract projects for pre-engineered buildings
- Evaluate specific capabilities, limitations of specified manufacturers or products on projects as well as feasible alternative products.
- Responsible for evaluating project related Architectural and Structural drawings, product specifications provided for the project and raising necessary RFI with Architects or Contractors
- Will ensure delivery of Project Outputs, including but not limited to; key plans, shop drawings, G N sheets, custom details, bills of material, fabrication sketches and cost estimates for the submission.
- Will plan, forecast, hire and manage in house staff and the necessary outside engineers and subcontractors to deliver output.
- Study and develop service offerings for new types of facade materials and deployment techniques.
- Provide leadership, technical direction/expertise, and training to staff.
- Ensure technical accuracy and soundness of output.
- Identify, pilot and implement new technologies that will enhance service offering

**Minimum Qualifications and Skills:**

- 2 years of experience in Commercial Building Construction work with various facade enclosure systems, CWs (Curtain Walls), Glass Facade, Concrete, 3D sheet metal, steel structures and pre-engineered buildings.
- Experience in cost estimation for construction projects.
- Experience in use of essential tools - AutoCAD, Bluebeam, Revit and Inventor.
- Familiarity with use of Microsoft 365 suite of products

**DEGREE REQUIREMENTS:**

- Bachelor Degree or foreign equivalent in Civil Engineering, Engineering, Operations Management or related field.

**HOURS:** Full Time (40 hours), Monday through Friday
